CASIO[®]

Getting Started

■ About Screen Receiver

- Screen Receiver provides the following functions.
 - Display of calculator screen images on a computer connected via a USB cable
 - Real-time display of calculation operation results
 - Zooming of display contents
 - Capture of screen contents
 - Copy and paste of captured screen images to other applications
 - Storage of captured screen images as image files
 - Printing of captured screen images

■ Using This Manual

- In this manual, different calculator models are referred to as shown below.
 - Type A Calculator: fx-CG10 Series, fx-CG20 Series, fx-CG50 Series, GRAPH90+ E, fx-9860GIII, fx-9750GIII, GRAPH35+ E II
 - Type B Calculator: ClassPad 330 PLUS
 - Type C Calculator: ClassPad II, fx-CG500
- The procedures in this manual assume that you are already familiar with the following standard computer operations.
- Menu operations using the mouse, including: clicking, double-clicking, dragging, etc.
 - Text input using the keyboard
 - Icon operations, general window operations, etc.
 - If you are not familiar with these types of operations, refer to the user documentation for your computer.
- The explanations in this manual cover both Windows and macOS. Most of the screen shots are from Windows 8.1, but operational procedures are virtually identical for both Windows and macOS.
- Note that the actual appearance of the screen that appears when using this software depends on your computer system setup and on the operating system you are using.
- Screen shots shown in this User's Guide are intended for illustrative purposes only. The actual text and values that appear on display may differ from the examples shown in this User's Guide.
- This manual explains Screen Receiver operations using a Type A Calculator. Screen Receiver operations are identical when using a Type B or Type C Calculator.

■ System Requirements

Windows

Operating Systems:

Windows 8.1 (32-bit/64-bit), Windows 10 (32-bit/64-bit), Windows 11 (64-bit)
Your hardware configuration needs higher than functionalities that operating system recommends.

Computer: Computer with one of the Windows operating systems pre-installed (Excluding computers with an upgraded operating system and self-built computers.)

Disk Space: 100MB for installation and uninstall

Note: Actual requirements and product functionality may vary based on your system configuration and operating system.

Other: USB port for direct connection. Do not connect via a USB hub.
Video adapter and display must support resolution of XGA (1024×768) or higher, 16 bit or higher system color.
Adobe® Reader® 8.0 or later.

macOS

Operating Systems:

macOS 10.15, macOS 11, macOS 12
Your hardware configuration needs higher than functionalities that operating system recommends.

Computer: Intel® Processor / Apple M1 Processor
Computer with one of the Macintosh operating systems pre-installed (Excluding computers with an upgraded operating system.)

Disk Space: 100MB for installation and uninstall

Note: Actual requirements and product functionality may vary based on your system configuration and operating system.

Other: USB port for direct connection. Do not connect via a USB hub.
Video adapter and display must support resolution of XGA (1024×768) or higher.
For Retina display, use of the Low Resolution mode is recommended.

1. Installing and Uninstalling Screen Receiver

This section explains how to install and uninstall Screen Receiver.

To install Screen Receiver

Note

- Do not install Screen Receiver into a folder that is used by other software.

1. On your computer, double-click the Screen Receiver application EXE file.

2. Perform operations as instructed by the text that appears on the screen.

3. The dialog box shown below will appear when installation is complete.

4. Click the [Finish] button.

- This completes installation.

Note

- Installing the software will put a "Screen Receiver" shortcut icon on your desktop.

To uninstall Screen Receiver

Windows

1. Display the Windows Control Panel.
2. Click [Programs and Features].
3. On the list of applications that appears, select “Screen Receiver”.
4. Click the [Uninstall] button.
 - This will display the program maintenance wizard.
5. Click the [Yes] button.
 - This completes the uninstall operation.

macOS

1. Move Screen Receiver(.app) to the Trash folder.
2. From the menu, select [Finder] and then [Empty Trash].

To start up Screen Receiver

1. Windows: On your computer’s desktop, double-click the “Screen Receiver” icon.
macOS: In the “Applications” - “CASIO” folder, double-click “Screen Receiver”.
 - Windows: You could also start up the application by clicking [Start] - [Program] - [CASIO] - [Screen Receiver] - [Screen Receiver].

Windows

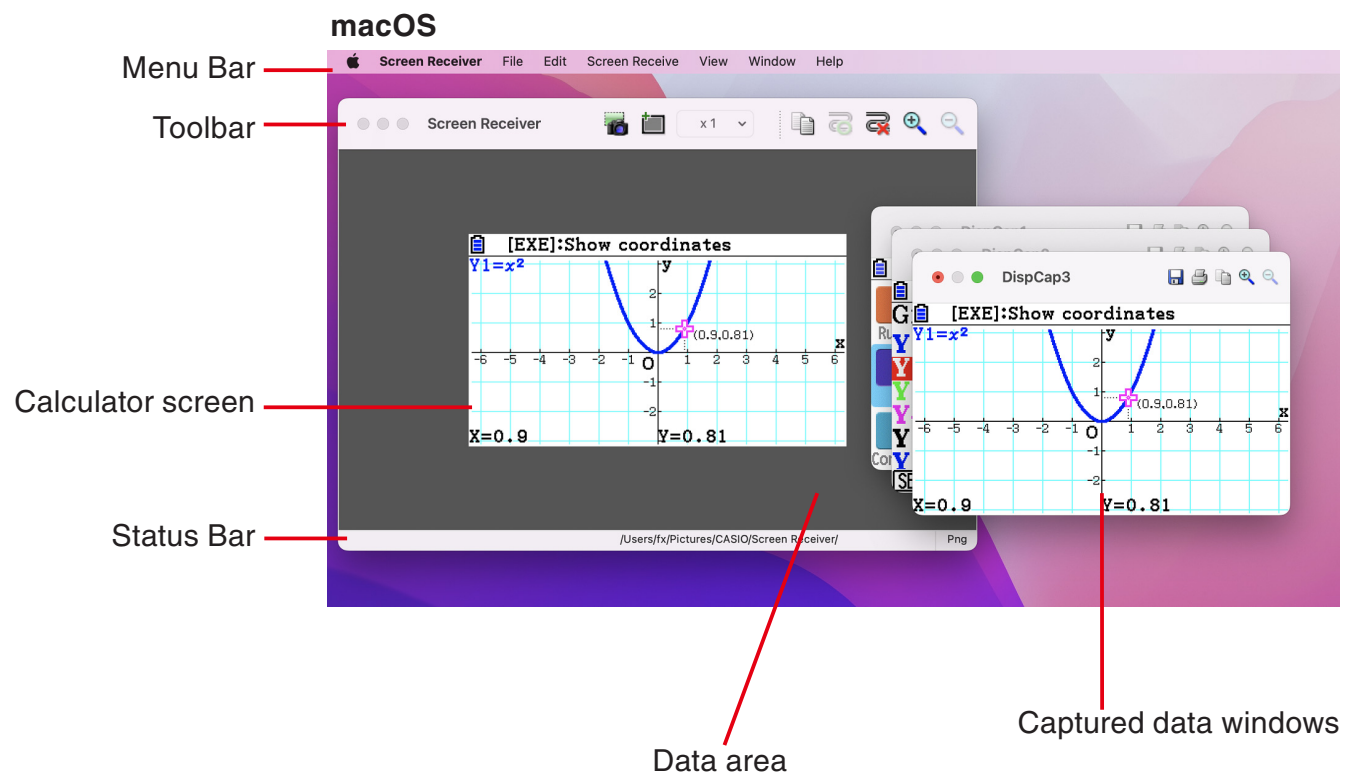

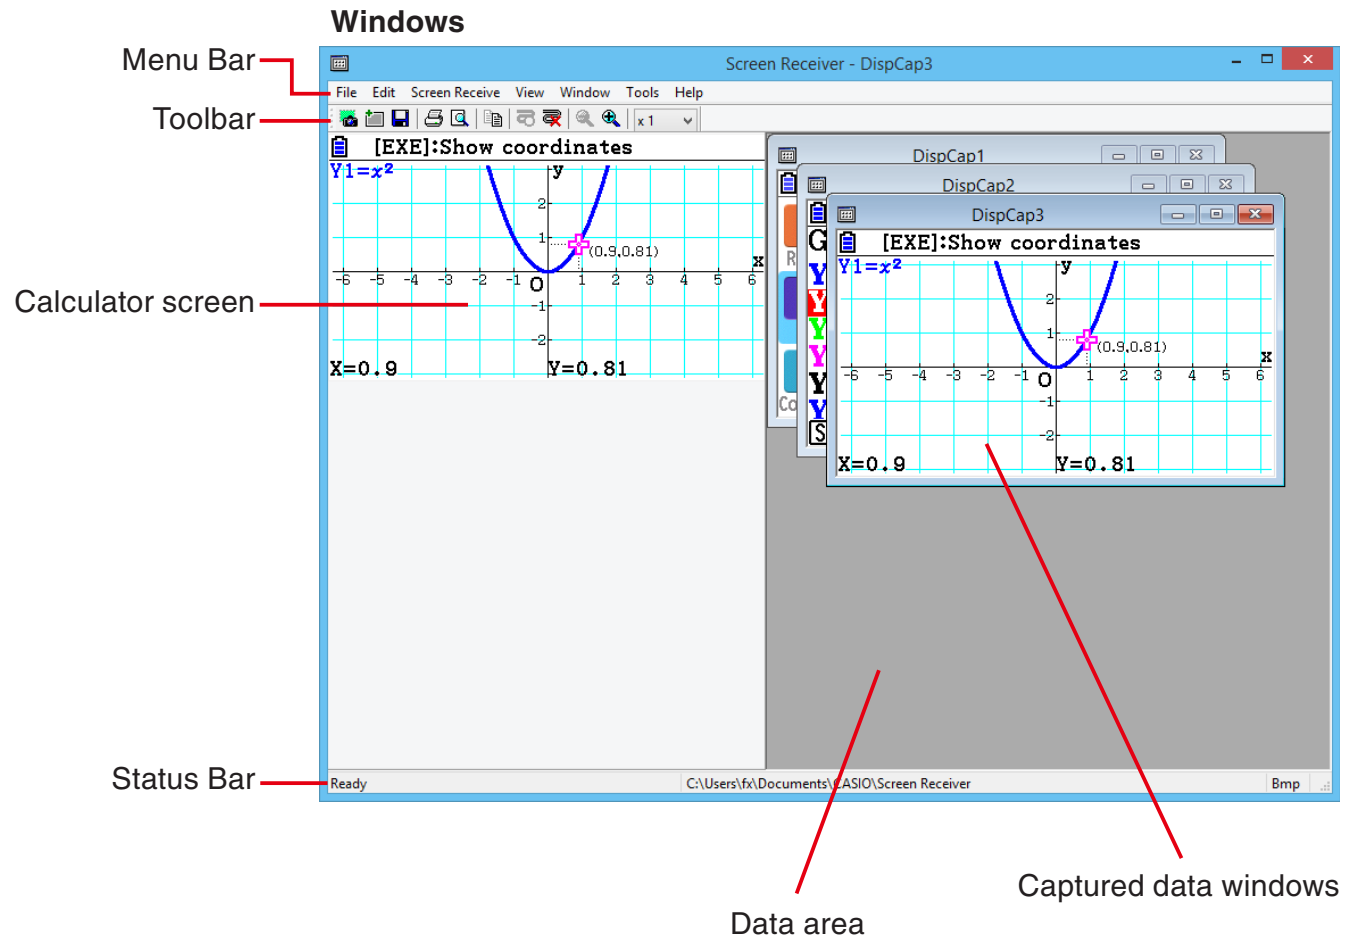

macOS

2. Screen Configuration

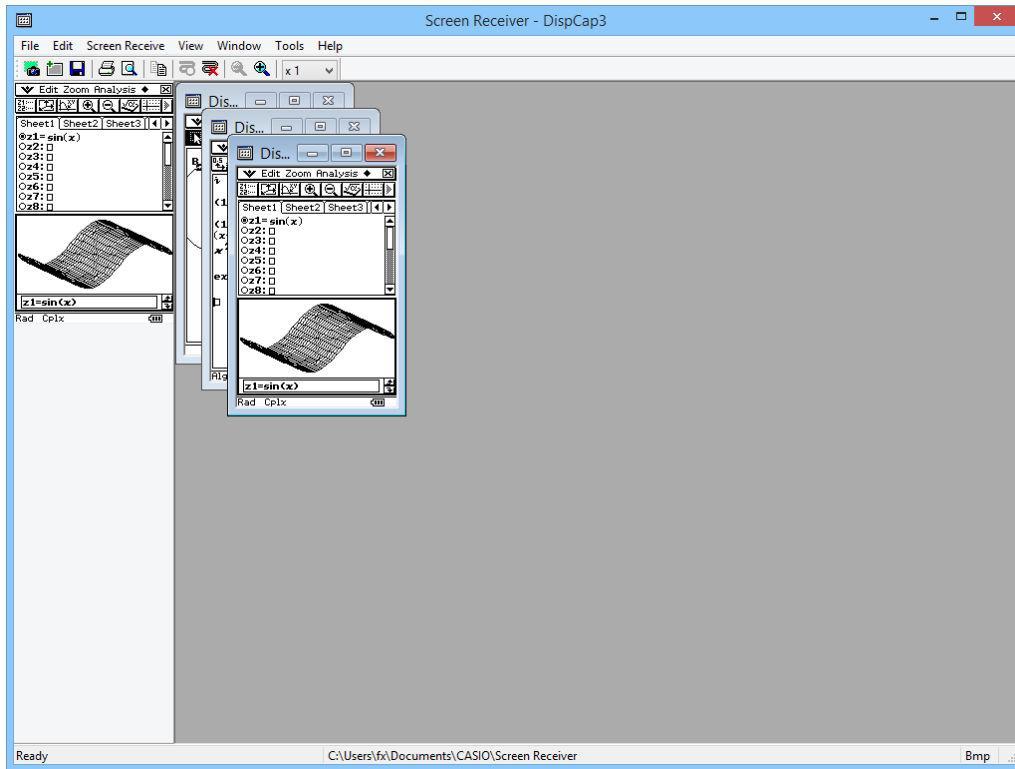

The following shows the Screen Receiver screen.

■ When connected to a Type A Calculator

■ When connected to a Type B Calculator

Windows

macOS

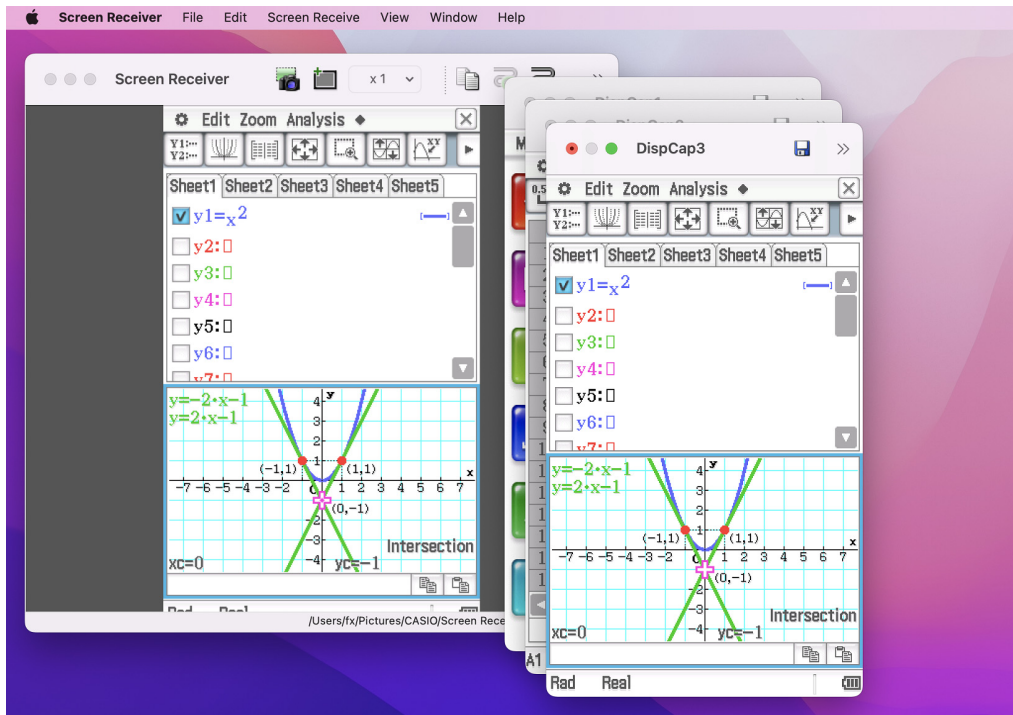

■ When connected to a Type C Calculator

Windows

macOS

Menu Bar

- This section explains the Screen Receiver menu bar.
- If a menu command can also be executed by clicking a toolbar button, the applicable toolbar button is also provided.

■ File Menu

Menu	Toolbar Button	Description
Close		Closes the active captured data window.
Capture Screen		Captures the calculator screen. Each capture adds a capture screen to the captured data area.
Save		Saves the contents of the active data capture window, overwriting the existing data.
Save As		Saves the contents of the active data capture window under a new file name.
Print		Prints the contents of the active captured data window.
Print Preview* ¹		Displays a preview of the print image.
Print Setup		Displays the print setup dialog box.
Exit* ²		Exits Screen Receiver.

*¹ Windows only

*² macOS: On the [Screen Receiver] menu, selected [Quit Screen Receiver].

■ Edit Menu

Menu	Toolbar Button	Description
Copy		Copies the contents of the active captured data window to the clipboard.

■ Screen Receive Menu

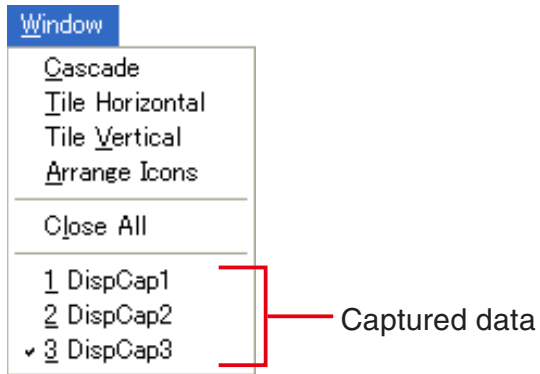

Menu	Toolbar Button	Description
Start		Establishes a connection between Screen Receiver and calculator and displays the calculator screen contents.
Stop		Terminates the connection between Screen Receiver and the calculator.

■ View Menu

Menu	Submenu	Toolbar Button	Description
Reduce			Reduces the size of contents of the active captured data window.
Expand			Expands the size of the contents of the active captured data window.
Zoom	× 1		Displays the contents of the active captured data window in its actual size.
	× 2		Displays the contents of the active captured data window as 2X its actual size.
	× 3		Displays the contents of the active captured data window as 3X its actual size.
Toolbar			Toggles display of the toolbar on and off.
Status Bar			Toggles display of the status bar on and off.

■ Window Menu

Menu	Description
Cascade	Stacks captured data windows.
Tile Horizontal* ¹	Lines up captured data windows horizontally.
Tile Vertical* ¹	Lines up captured data windows vertically.
Arrange Icons	Displays captured data windows as icons.
Close All	Closes the all captured data windows.
(Captured data)	Shows the names of the displayed captured data.

*¹ Windows only

■ Tools Menu (Windows only)

Menu	Description
Options* ¹	Displays a dialog box for configuring optional settings.

*¹ macOS: On the [Screen Receiver] menu, selected [Preferences...].

■ Help Menu

Menu	Description
Manual	Displays the Screen Receiver User's Guide.
License	Displays the end user license agreement.
About*1	Displays version information.

*1 macOS: On the [Screen Receiver] menu, selected [About Screen Receiver].

Status Bar

- ① Help text is displayed here (Windows only).
- ② Folder where captured data is stored
- ③ File name extension of captured data files

3. Using Screen Receiver

3-1 Establishing a Connection between Screen Receiver and a Calculator

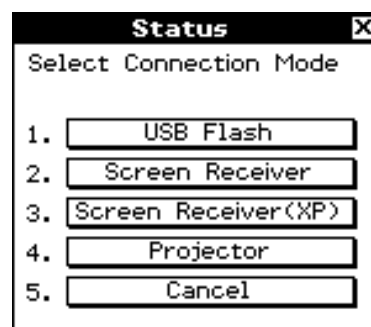

Important!

- Do not connect the calculator to the computer before starting up Screen Receiver. Start up Screen Receiver first.

1. Start up Screen Receiver.
2. Use the USB cable that comes with the calculator to connect it to your computer.
 - This will display the dialog box shown below.

Type A Calculator

Type B or Type C Calculator

3. Type A Calculator (fx-CG10 Series, fx-CG20 Series, fx-CG50 Series, GRAPH90+ E):
For Windows 8.1, Windows 10, Windows 11 user: press **[F2]**.
For Windows XP user: press **[F3]**.
For macOS user: press **[F2]**.
Type A Calculator (fx-9860GIII, fx-9750GIII, GRAPH35+ E II):
For Windows 8.1, Windows 10, Windows 11 user: press **[F3]**.
For macOS user: press **[F3]**.
Type B or Type C Calculator:
For Windows 8.1, Windows 10, Windows 11 user: tap [Screen Receiver], or press the **(2)** key.
For Windows XP user: tap [Screen Receiver(XP)], or press the **(3)** key.
For macOS user: tap [Screen Receiver], or press the **(2)** key.
 - This will display the dialog box shown below.

Type A Calculator

Type B or Type C Calculator

• USB Connection Precautions

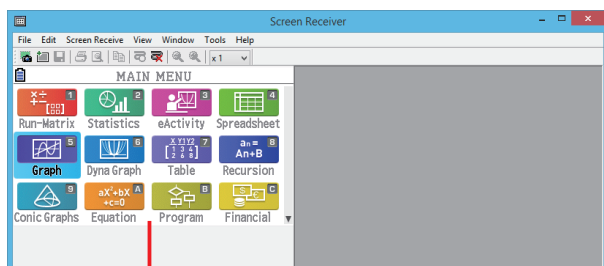

A USB connection between the calculator and a computer may be terminated automatically if the computer enters a power save mode, sleep mode, or any other standby state. If this happens, disconnect and then reconnect the USB cable.

4. Type A Calculator: Press **[EXIT]**.

Type B or Type C Calculator: Tap **[OK]**.

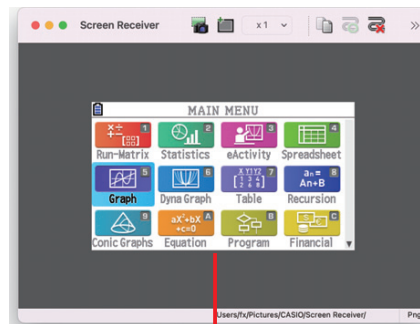

- This automatically establishes a connection between Screen Receiver and the calculator, and displays the calculator screen on the Screen Receiver window. Wait until the calculator screen appears on the Screen Receiver window before performing any calculator operation.

Windows

Calculator screen

macOS

Calculator screen

5. Perform the operations you want on the calculator.

- The calculator screen displayed by Screen Receiver will change in real time as you perform operations on the calculator.

6. To terminate the connection between Screen Receiver and calculator, click .

7. Disconnect the USB cable from the computer and calculator.

Note

- If the connection between Screen Receiver and the calculator terminates for some reason, click  to reconnect.

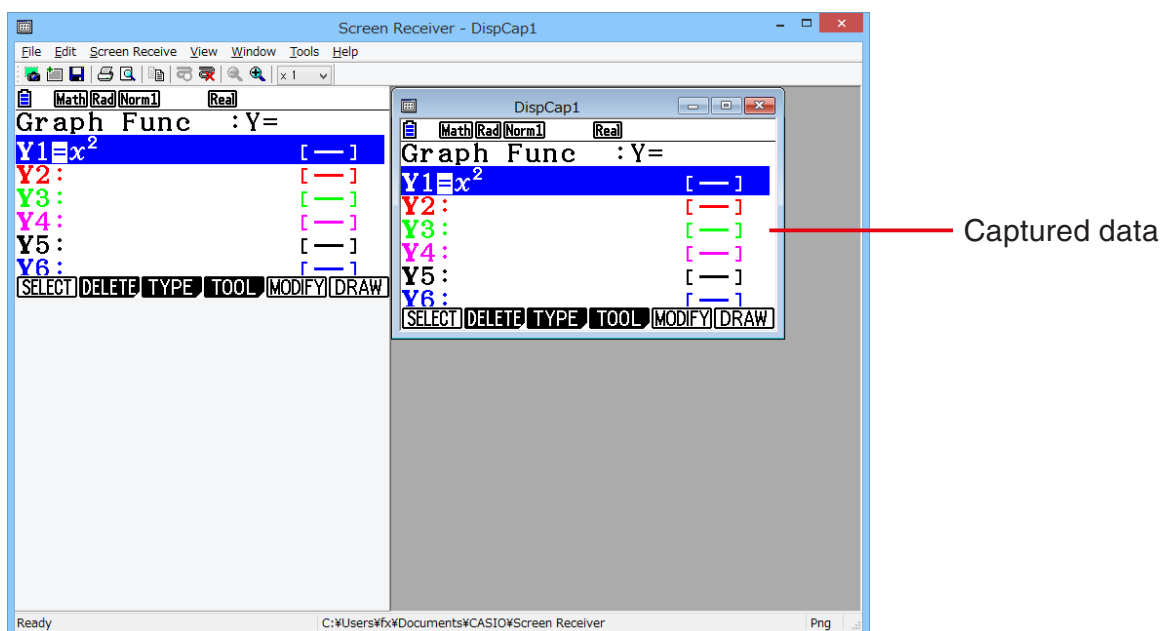

3-2 Calculation Operation Precaution

- The way figures are drawn and the cursor moves on the Screen Receiver screen may not exactly match what appears on the calculator screen.
- Attention Windows 8.1, Windows 10, Windows 11 users
The calculator does not support the operations below while there is a connection between the calculator and Screen Receiver.
 - File delete
 - Folder create or rename
 - Backup
 - Optimization
 - Reset operations (Add-In, Storage Memory, Add-In&Storage, Main&Storage, Initialize All, Language File)

Screen Receiver will not display the calculator screen while the calculator is performing a file save operation. The calculator screen will appear after the file save is complete.

3-3 Capturing the Calculator Screen

1. Perform the required operation on the calculator to display the screen you want to capture.
2. Click .
 - This displays the captured data.

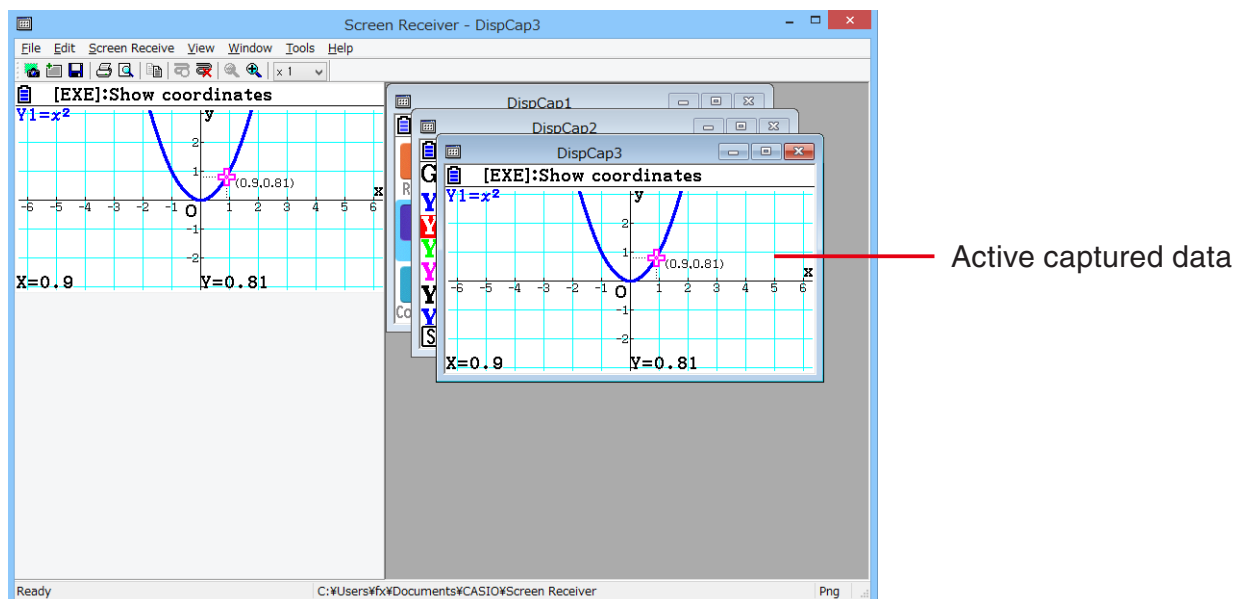

3. Repeat steps 1 and 2 to capture other screens, if you want.

Note

- You can put a frame around the captured data by clicking . Each click toggles between framed and unframed data. For more information, see “4-2 Capture Settings” (page E-24).

3-4 Making a Captured Data Window Active

Clicking a captured data window makes it the active window.

Note

- Only one captured data window can be active at any time.
- To zoom, copy, save, or print the contents of a captured data window, you first must make it the active window.

3-5 Copying Captured Data Window Contents to the Clipboard

1. Make the captured data window that contains the data you want to copy the active window.
2. Click  to copy the captured data to the clipboard.

3-6 Saving Captured Data

Make the window that contains the captured data you want to save the active window, and then click .

Note

- Saved captured data is automatically assigned a file name of the following format: DispCapXX.XXX.
- The file format (bmp*, jpg, png) and storage folder are in accordance with the settings described under “4-1 File Save Settings” (page E-24).
 - * Windows only
- You can use the [Save As] command on the [File] menu to save the file under a different name.

3-7 Auto File Save

Attempting to exit Screen Receiver while there is unsaved captured data will cause the dialog box shown below to appear.

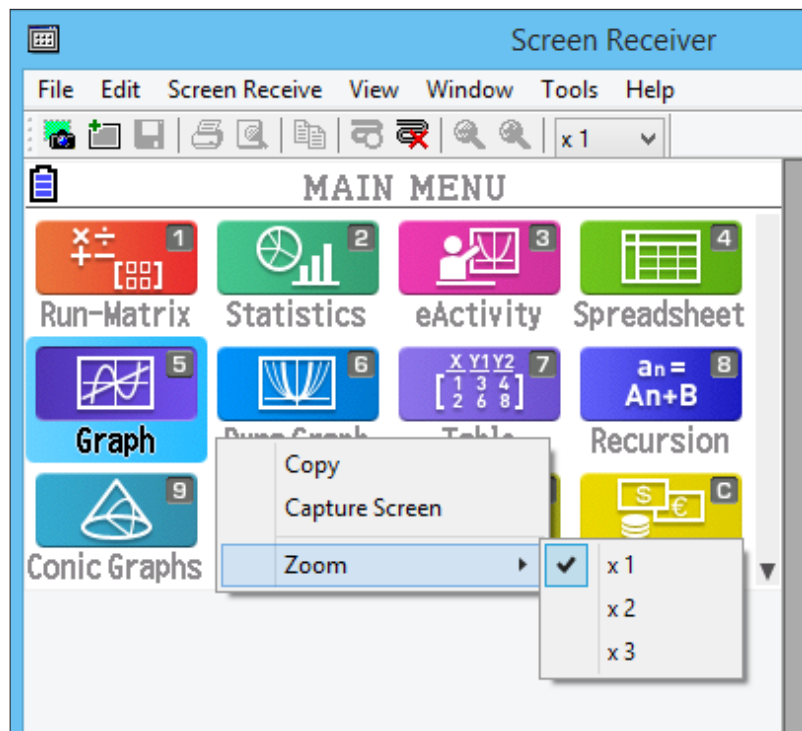

- ① Specifies the file format for the saved file. You can select bmp*, jpg, or png.
* Windows only
- ② If there is already a file with the same name that you specify, this option specifies whether or not the older version should be overwritten with the new one.

3-8 Resizing a Screen Image

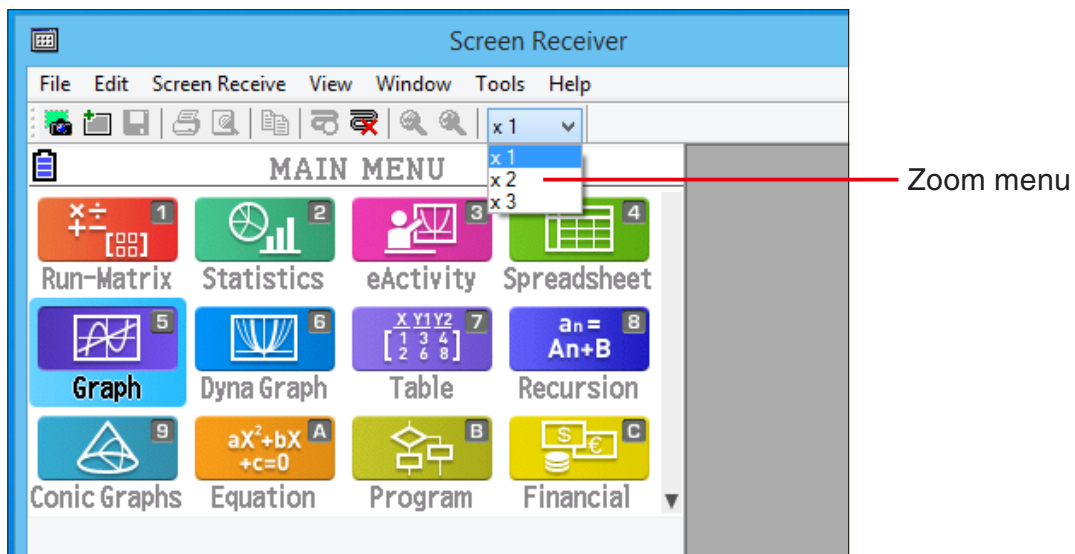

To resize the calculator screen

Right-click the calculator screen. Click [Zoom] on the shortcut menu that appears and then select a zoom factor.

To resize the calculator screen when capturing it

On the toolbar, click the down arrow button of the zoom box. On the menu that appears, select a zoom factor.

To resize captured data

Make the window that contains the captured data you want to resize the active window, and then click  or . You can select one of three sizes.

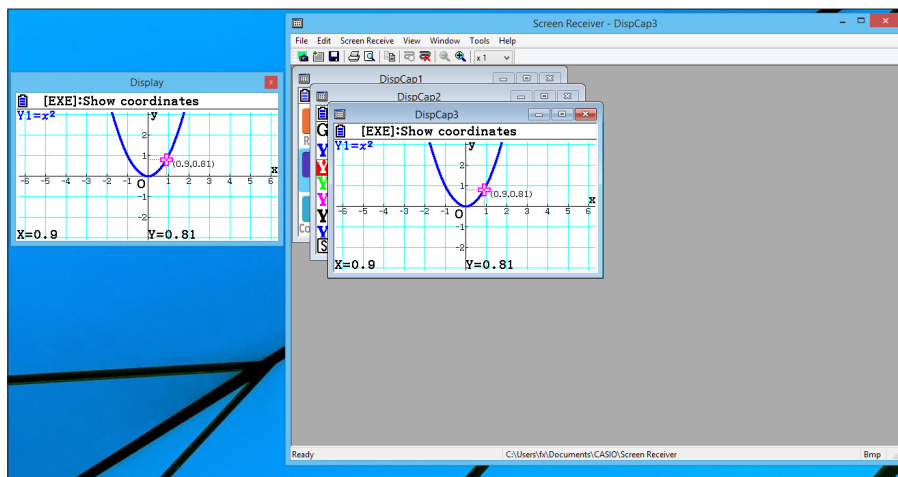

You also can resize by selecting a zoom factor with the [Zoom] command on the [View] menu.

3-9 Using a Floating Calculator Screen (Windows only)

You can display the calculator screen in its own window that is separate from the Screen Receiver window.

To make the calculator screen a floating screen

1. Double-click the calculator screen.
2. Drag the calculator screen to the location you want, either inside or outside of the Screen Receiver window.

To return a floating calculator screen to the Screen Receiver window

- Double-click the floating calculator screen.
- Drag the calculator screen back to the left side of the Screen Receiver window.

Important!

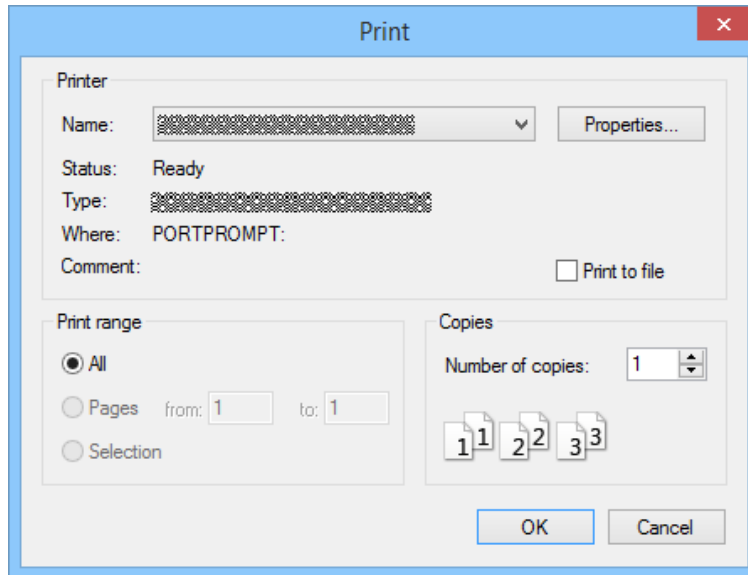

- You can return a floating calculator screen only to the left side of the Screen Receiver window. Dragging top, bottom, or right side of the main window will not work.

3-10 Printing

- You can print the contents of a captured data window, if you want.

1. Make the captured data window that contains the data you want to print the active window.

2. Click . This will display the Print dialog box.

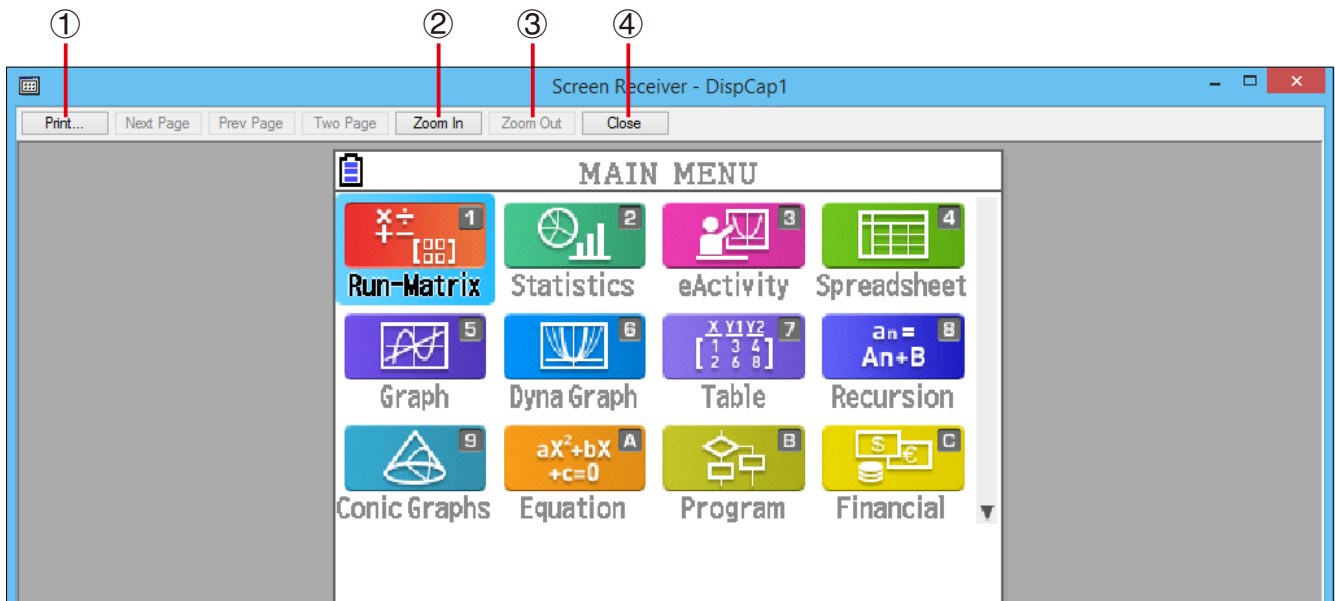

3. Click [OK] to start printing.

Important!

- Only the contents of the currently active captured data window can be printed. You cannot print the contents of multiple captured data windows with a single print operation.
- Images are printed in accordance with width setting of the paper size selected on the Print dialog box.

■ Print Preview (Windows only)

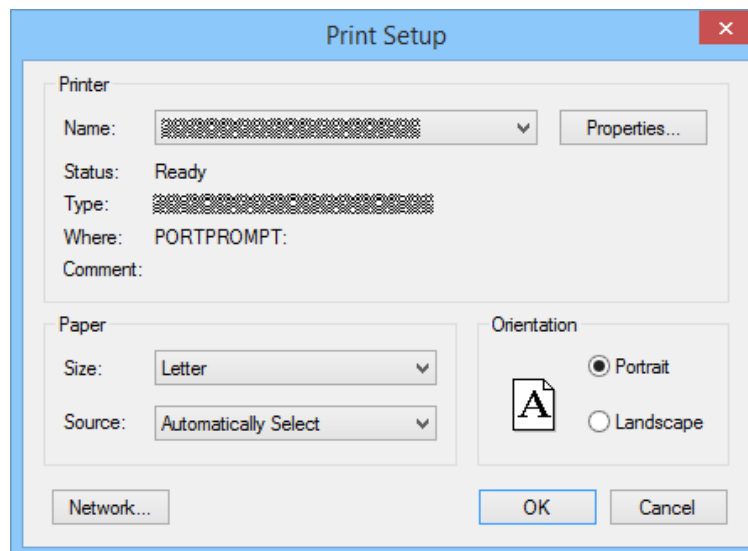

- Click  to display the print preview window.

- ① Displays the Print dialog box.
- ② Enlarges the preview image.
- ③ Reduces the size of the preview image.
- ④ Closes the print preview window image.

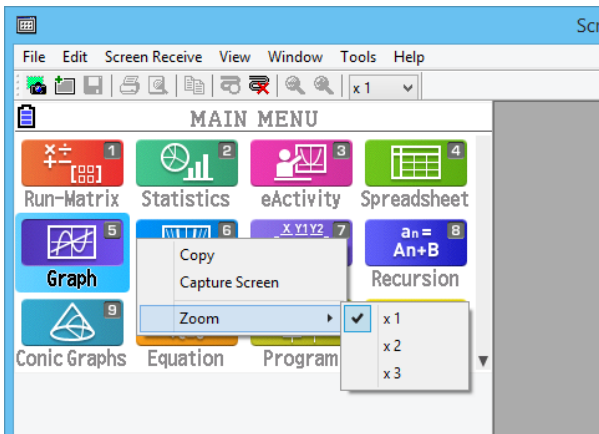

■ Print Setup Dialog Box

- Selecting [Print Setup] on the [File] menu displays the Print Setup dialog box.

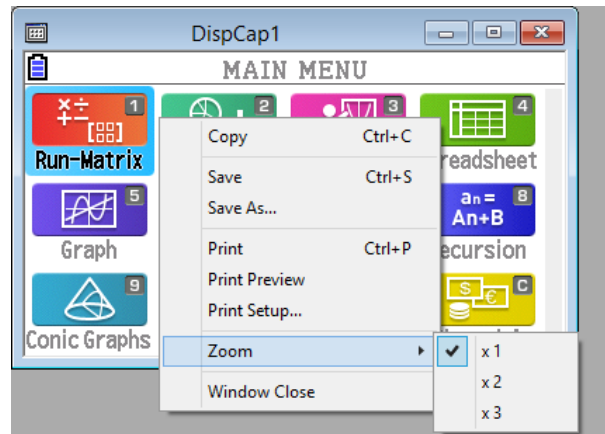

3-11 Shortcut Menu

On the calculator screen or captured data window, right-clicking with your mouse (Windows) or performing a control+click (macOS) will cause the shortcut menu shown below to appear.

Calculator screen

Captured data

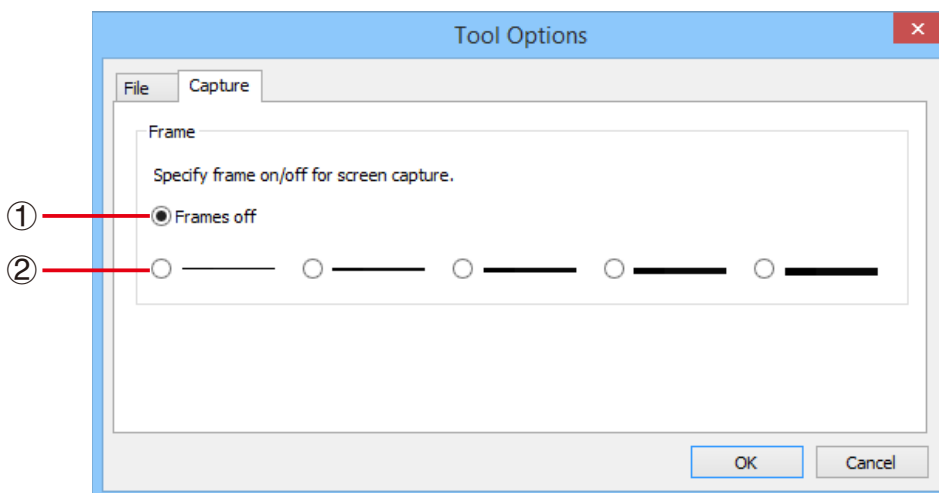

4. Tool Options Dialog Box

4-1 File Save Settings

- ① File name extension of captured data files
Bmp: Windows only
- ② Storage folder

4-2 Capture Settings

- ① Specifies unframed captured screen images
- ② Specifies framed captured screen images, and frame thickness.
